

GANDHE SRAVAN KUMAR

Warangal, Telangana | +91 8143159021 | sravankumargandhe15@gmail.com | [LinkedIn](#)

SUMMARY

AI/LLM-focused engineering graduate with hands-on experience in LLM response evaluation, instruction-following assessment, data validation, workflow automation, and AI quality assurance. Evaluated 1,500+ AI-generated responses weekly, improving model consistency and alignment by 35% through systematic RLHF and SFT evaluation. Skilled in Regex-based validation, hallucination detection, structured data processing, data analytics, and high-volume operational systems.

TECHNICAL SKILLS

AI & LLM: LLM Response Evaluation, Instruction Following, RLHF, SFT, AI Quality Assurance, Hallucination Detection, AI Data Validation, Prompt Engineering

Automation & Workflows: Automated Workflows, Salesforce Flows, Workflow Optimization, Pipeline Management, Automated Job Sourcing

Data & Analytics: Data Analytics, SQL (Basic), Regex, Data Cleaning, Data Validation, Anomaly Detection, Records Management

CRM & Platforms: Salesforce Admin, Salesforce Lightning Architecture, Enterprise Portals (Workday, Greenhouse, SAP SuccessFactors)

Programming & Tools: Python, MS Excel (Pivot Tables, VLOOKUP, Custom Formulas), Google Workspace (Sheets, Forms, Docs)

Engineering: Machine Learning, Microcontrollers, Sensors, IoT

PROFESSIONAL EXPERIENCE

LLM Post-Training Intern / Training Specialist

Mar 2026 – May 2026

Ethara AI

Remote

- Improved LLM consistency and alignment by 35% by evaluating and refining 1,500+ AI-generated responses weekly across reasoning, structure, and instruction-following criteria.
- Reduced logical inconsistencies by 30% by applying Regex-based validation to clean raw data and identify potential AI hallucinations.
- Maintained 96%+ validation accuracy while exceeding daily throughput targets by 15% through systematic RLHF and SFT evaluation workflows.
- Strengthened AI quality standards by collaborating with US and China teams to develop evidence-based evaluation guidelines and data-audit workflows.
- Improved post-training data quality by applying structured validation checks to identify response-level errors and alignment issues.

Operations Executor / Data Operations Executive

Feb 2026 – Present

ApplyRyt

Remote

- Executed high-volume automated application workflows across Workday, Greenhouse, and SAP SuccessFactors while maintaining consistent processing standards.
- Maintained 99%+ database accuracy by auditing submission records and managing structured workflow-tracking data in MS Excel and Google Sheets.
- Streamlined application pipelines, candidate logs, and recurring data-verification processes to minimize workflow bottlenecks and errors.

PROJECTS

Music Recommendation Using Facial Expressions

Python & Machine Learning

- Built a real-time facial-expression analysis application using Python and machine learning to classify expressions and automatically generate matching music recommendations.
- Automated playlist recommendations by connecting real-time expression analysis with music-selection logic.

Automation in Hydroponics IoT

IoT Project

- Engineered an automated environmental-monitoring system using microcontrollers and sensors for real-time tracking of hydroponic conditions.
- Enabled continuous environmental monitoring by integrating sensor inputs with a microcontroller-based automation workflow.

EDUCATION

Bachelor of Technology – Electronics & Communication Engineering

Nov 2021 – May 2025

Kakatiya Institute of Technology & Science, Warangal, Telangana

CERTIFICATIONS

- Deloitte Australia – Data Analytics Job Simulation
- 1 Million Prompters – dub.ai
- AIoT and its Applications (2024) | Digital Marketing – Focus on Target Sourcing & Reaching Metrics (2024)
